CPAP Hose Cover

Instructions for use – **ENGLISH**

DEVICE DESCRIPTION/INTENDED USE

CPAP Hose Cover is an accessory to CPAP medical device, and it is made of soft brushed polar fleece fabric. It is used as insulator for CPAP hose to prevent rainout (condensation buildup) and at the same time it creates a soft barrier between the hard tubing and the skin.

VARIANTS/ COMPATIBLE DEVICE

6ft Hose Cover	Compatible with all types of 6ft CPAP Tubing
----------------	--

WARNING

- Report any serious incident that has occurred in relation to the device to the manufacturer and the competent authority of the Member State in which the user and/or patient is established

FITTING YOUR STRAP COVER

- Lay your CPAP Hose cover on a flat surface or lengthwise position.
- Open the hook and loop lock.
- Insert the tubing until it reaches the opposite end of the cover.
- Secure the tubing by closing the hook and loop on both ends.

PRECAUTION

Make sure that the Hose Cover is clean and fits properly to the CPAP Tubing before use.

HOSE COVER CARE INSTRUCTIONS

It is important to follow the steps below to get the best performance out of your CPAP Hose cover.

- Machine wash with cold water and air dry.
- It is generally recommended to wash the CPAP Hose cover every 3-7 days of use.
- It is also important to remember that with regular use, the Hose Cover may not provide same level of comfort as it did when it was new, in that case, it's a good idea to change the Hose Covers.

CAUTION

- Avoid using bleach or fabric softener to maintain the softness, stretch and quality of the fabric material.
- Regularly wash your CPAP Hose cover to prevent the growth of germs that can adversely affect your health.

STORAGE

Ensure the Hose cover is clean and dry before storage. Store in a cool dry place.

DISPOSAL

The CPAP Hose cover packaging does not contain any hazardous substances and may be disposed of with normal household waste.
